

**Aztec Rituals Tattoo**  
**Emu oil**  
**Natural aftercare for new tattoos and piercings**

Emu oil is a deep penetrating, hypo-allergenic, highly moisturizing nutritional supplement for your skin. Emu oil does not clog pores which allow the skin to breathe during the healing process. It is rich in essential fatty acids that feed the skin and aid in new cell development that helps promote faster healing. Can be used to eliminate keloids and reduce recent scarring. It is also beneficial with other skin conditions such as rashes, eczema and psoriasis.

**For piercing:** Apply Emu oil after the piercing has been cleaned. Gently massage a single drop around the piercing (entrance and exit) with a clean finger. Desert Palms Emu Oil is safe to use on tongue, labrets and genital piercings. Use to aid healing problematic piercings.

**For stretching:** Massage Emu oil daily to area 1-2 weeks prior to stretching to keep skin moist and pliable. Apply Emu oil to new jewelry before insertion to ease glide. Emu oil helps strengthen skin and can prevent tears and blow outs. Emu oil is safe to be used on all jewelry, including organics.

**For tattoos:** Use Emu Tattoo Therapy to minimize flaking and scarring. To be used 4-6 times daily during the entire healing process.

A little goes a long way! Apply only a thin layer to keep skin moist during healing process.

If you have any additional questions never hesitate to contact your piercer or tattoo artist. It's our pleasure to answer any queries.

514-723-2676

Note: Emu oil should not be used on scarification or branding as it reduces scabbing and scarring. Emu oil is not vegan friendly.
